

Operating at the heart of the integrated PV power and storage system, our ET PLUS+ hybrid inverters are designed to maximise energy output, enhance self-consumption and facilitate back-up power. With intelligent load controls and wide battery voltage range, the set-up can be flexibly configurated to meet individual needs across the residential ecosystem. The ET PLUS+ series can be combined with a range of battery capacities and brands, including the GoodWe Lynx Home F.

Fanless and silent

Smart home integration

UPS level switching <10ms

^{*1:} For 1000V system, maximum operating voltage is 950V.

*2: According to the local grid regulation.

*3: Peak output apparent power can be reached only if PV and battery power is enough.

*4: For Belgium, max. output apparent power(VA): GW5K-ET is 5000;

GW6.5K-ET is 6500; GW8K-ET is 8000; GW10K-ET is 10000.

^{*5:} CAN communication is configured default. If RS485 communication is used, please replace the corresponding communication line. *6: No Back-up Output.

^{*:} Please visit GoodWe website for the latest certificates
